### Global Warming

Global warming is the long-term rise in the average temperature of the Earth's atmosphere and oceans and is primarily caused by the greenhouse effect generated by greenhouse gases.

### कार्बन आणि ऑक्सीजन चक्र

The Carbon Cycle and Oxygen Cycle are interconnected processes that maintain the balance of these elements in the environment. The Carbon Cycle involves the exchange of carbon between the atmosphere, land, and water, while the Oxygen Cycle involves the exchange of oxygen between the atmosphere, land, and water.
